8. Claim 21 is objected to because of the following informalities: In line 2, "the diagnostic tool software" lacks antecedent basis. Appropriate correction is required.

9. Claim 22 is objected to because of the following informalities: In line 1, "the diagnostic tool software" lacks antecedent basis. Appropriate correction is required.

Art Unit: 2113

14. Claim 34 is objected to because of the following informalities: In line 6, “the diagnostic test” lacks antecedent basis. Appropriate correction is required.

15. Claim 35 is objected to because of the following informalities: In line 5, “the new link” lacks antecedent basis. Suggestion: the replacement link. Appropriate correction is required.

16. Claim 36 is objected to because of the following informalities: In line 1, “the link isolation test” lacks antecedent basis. Appropriate correction is required.

***Allowable Subject Matter***

19. Claims 1-43 are allowed.

20. The following is an examiner’s statement of reasons for allowance:

With respect to claims 1, 16 and 31, the Examiner asserts that the novelty of the claim, when read as a whole, is “performing an initial test to determine if there is a failure in the path,

Art Unit: 2113

adding at least one of the path components to a suspect list capable of being a cause of the failure, wherein the suspect list is implemented in a computer readable data structure, performing at least one isolation test on at least one of the path components added to the suspect list, removing the tested path component from the suspect list if the isolation test confirms that the tested path component cannot be a source of the failure, and returning the suspect list to a user to provide information on the path components capable of being the cause of the failure.”

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

### ***Double Patenting***

21. Claim 44 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 15. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

### ***Claim Rejections - 35 USC § 112***

22. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2113

23. Claims 45-48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 45, in lines 5-6, it states: “the rule object calls *test descriptors* associated with a testing operation to perform”, and then in lines 7-9, it states: “a test descriptor object includes *test descriptors*, wherein each *test descriptor* specifies one or more program modules to perform the testing operation associated with the *test descriptor*”, and in lines 10-13 it states: “a module object including program modules providing code to perform testing operations, wherein a call to one *test descriptor* executes the program modules specified by the *test descriptor* to perform diagnostic testing operations according to the operation flow specified in the rule object.” It is indefinite as to which “test descriptors” are doing what. Some are called by the rule object, while others are included in the test descriptor object. It is not clear if these test descriptors are one of the same or different.

Claims 46-48 are rejected as being dependent on a rejected base claim.
